WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Back plate 200 x 310 x 10 mm with two 11 mm holes on its centre line, 150 mm apart, matching the holes in the left post.

Shelf 380 x 600 x 6 mm, welded square to the back plate 150 mm above its bottom edge.

Two brackets 250 x 80 x 6 mm under the shelf, 200 mm apart, welded to the shelf and the back plate.

Fit: bolted to the outer face of the left post with two M10 through-bolts; the shelf top 608 mm from the floor.

It holds the notching punch, its lever and the ring head with its spacer plate and coupling (about 40 kg).

Check: level both ways; no movement when loaded by hand.

DRUMPANEL

github.com/BoujeeEnjinia1701/drumpanel

DrumPanel tool shelf on the left rail post: making sketch
