WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Rail beam: 80 x 40 x 3 mm RHS, 1,540 mm long, stood on its narrow edge (80 mm tall). The top face is the trolley track: keep it clean and free of weld spatter; file any seam bead flat.

Holes: two 11 mm vertical holes through both walls at each end, 17.5 and 97.5 mm from the end, on the centre line.

Crush tubes: 14 mm tube 74 mm long inside the beam at each hole so the through-bolts do not crush it.

Fit: each end sits on a post cap, held by two M10 x 110 bolts; the bolt heads on top stop the trolley at the ends.

Check: the top face is straight within 1 mm over its length (a taut string or a straightedge).

DrumPanel rail beam: making sketch
