WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A hood over the upper disc: 1.5 mm sheet, 118 mm long, 18 mm wide outside, 64 mm tall, with a 108 mm arched opening for the disc.

Front skirt: a 10 mm deep plate down the front of the hood, ending 8 mm above the sheet line and 52 mm ahead of the nip, so a finger cannot reach the nip from the front.

A 26 mm hole in the back face for the upper shaft.

Fit: two M5 screws into the upper housing; it does not touch the disc (at least 2 mm clear all round).

Check: with the head on a drum, nothing thicker than 8 mm passes under the skirt; the guard is on before the crank is turned.
