| P1  | Making sketch for the prototype build plan | 2026-10-03 | AC |

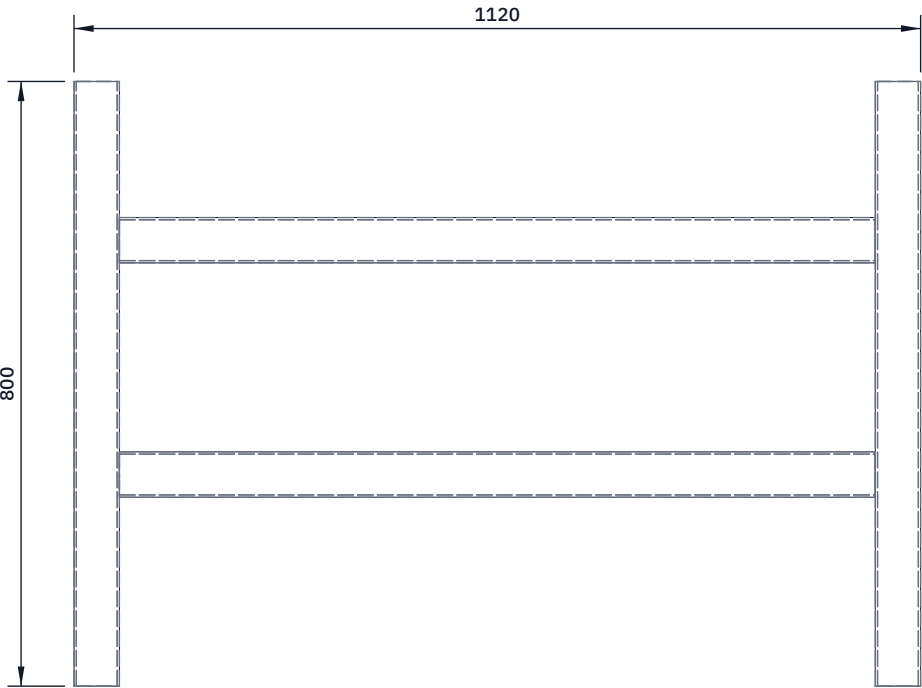

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Two cross rails 800 mm long, 1,060 mm apart (centres).  
Two long rails 1,000 mm between them, at 120 mm in front of and 190 mm behind the pinch line (centres), flush on top.  
Weld on a flat floor or table; diagonals within 2 mm.  
Holes: four 13 mm holes in each long rail for the side frame feet (two per foot, 50 mm apart), 467.5 mm each side of the middle.  
Fit: the side frame legs stand on foot plates bolted to the long rails with 2 x M12 each. The cross rails stick out 400 mm each way so the stand cannot tip.  
Check: rocks on no corner on a flat floor; shim if needed.
