WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Bracket: 10 mm plate 190 x 120 mm, bolted to the outer face of the right-hand side frame (front prong) with 4 x M10.

Housing: 50 mm round bar 40 mm long bored 26 mm for two bronze bushes, welded square to the bracket, 230 mm in front of the pinch line and 50 mm below the lower roll centre.

Crank shaft: 25 mm, 90 mm long; keyway for the 13 tooth sprocket.

Crank: arm 24 x 12 mm, 300 mm between centres; 28 mm grip 88 mm long, free to spin.

Sprockets #40: 13 teeth on the crank shaft, 39 teeth on the lower roll; line them up with a straightedge; chain slack 5 mm.

Fit: the chain guard bolts over both sprockets.

Check: one crank turn moves the sheet 63 mm.
