WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

In-feed guard: 920 x 92 mm, 50 mm in front of the pinch line; its lower edge 8 mm above the in-feed table, rolled to a 4 mm radius.

Out-feed guard: 920 x 79 mm, 150 mm behind the pinch line, lower edge 8 mm above the out-feed table.

Lid: 920 x 204 mm, joining the two guards over the rolls.

Chain guard: a box 30 x 355 x 180 mm round both sprockets, with holes for the shafts; bolted to the crank bracket housing.

Gear guard: a box 65 x 90 x 145 mm over the pinch gears, bolted to the left-hand side frame.

All guards held by M6 screws: a tool is needed to take them off.

Check: a 10 mm rod cannot reach any nip, gear or sprocket.
