WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

In-feed table: plywood 900 x 815 mm on an angle frame, four RHS legs; top 900 mm from the floor, level with the top of the lower roll; front edge 35 mm short of the roll.

Out-feed table: plywood 900 x 810 mm on a similar frame; top 913 mm from the floor, level with the top of the bending roll at its usual setting; starts 125 mm behind the pinch line.

Legs: 40 x 40 x 3 RHS with M10 levelling screws.

Seal the plywood; countersink the screws so the panels do not catch.

Check: a straightedge from each table to its roll shows no step over 1 mm.
